

The ForceCheck wireless chuck force gauge is designed to quickly and accurately measure holding force and speed of both 2 and 3 jaw chucks. Verifying chuck holding force allows manufacturers to improve the repeatability of a manufacturing process by checking actual holding force under dynamic (rotating) conditions, as well as perform critical preventative maintenance checks.

Features

- Measure RPM and chuck holding force
- Compatible with 2 and 3 jaw chucks

Size

Order Number

60 mm (2.36 in) Clamping Diameter Complete Set
Complete set includes wireless force sensor, display, and carrying case.
