

For measuring the clamping and holding mechanism on various pallet-based applications

Rev. 12-1116 Page 1 of 1  
Uncontrolled Document

Clamping force measuring gauges for pallets are intended to quickly measure the holding force of individual clamping heads.

Pallet clamping adapters are per-application based, and are fitted according to the specifications of the customer's pallet system.

Complete kit can include universal ForceCheck display readout, adapter cable, pallet clamping test adapter(s), and other accessories according to pallet clamping specifications.

**Pallet adapters can be or have been developed for pallet systems such as:**

- BERG Spanntechnik
- Rohm
- Mazak
- OTT-Jakob Spanntechnik
- Schunk
- Erowa
- And many others, whether foreign or domestic pallet clamping systems.
