

The Power Cooler is a new cooling unit to cool down tool holders. An air stream interspersed with a fine water mist cools down the shrink fit chucks of any shape in record time.

- Contour-independent cooling, therefore universal applicable for all sizes and diameters of shrink fit chucks
- Cools thick-walled tool holders far faster than common cooling systems
- A closed circuit with return of water and steam enables usage in clean areas such as the tool management or tool assembly
- Is intended to be docked to the Power Clamp Premium machines
