

Manually movable quick die changing system with drawbar style hydolock clamping

Rev. 19-0923 Page 1 of 1  
Uncontrolled Document

The hydromechanical self-locking (hydrolock) drawbar style die clamping system is designed for clamping dies of various widths on press slides. The clamping actuator can be moved manually in the T-slot of the press slide between the parking position and the respective die. Hydraulic pressure is at a maximum 90 bar.
