

Used for installation and removal or dismantling KS clamping cartridges (standard and high pressure clamping cartridges). The assembly tool makes insertion and removal of the clamping grippers, even on multi-spindle heads, an easy operation.

Note

Installation and removal of the clamping cartridge is made easier by using an extension piece.

Extension piece not included.

Available for HSK-C 32, 40, 50, 63, 80, 100
